

# YAYA LIFELINE

2001

## I just pop up

On a quiet morning in Zahra, Tunisia, as the dawn broke on April 8th, the world welcomed me. It was at Hospital, precisely at 5 AM, that my journey began, marking the start of my life's narrative.

2007

## I got Into School

By **the age of six**, following the Tunisian education system, I embarked on my academic journey, entering primary school. Spanning from 1st to 6th grade, this foundational phase prepared me for the subsequent stages of my educational path.

2013

## My Twelve Years Old!

By the time I reached the age above, I had transitioned into secondary school on a three-year journey encompassing grades 7 through 9, focus on holistic development.

2016

## High School

In this phase, the system resets the grade count, where all subjects get into french and I embarked on a four-year journey leading up to pivotal final exams and the threshold of university admission.

2021

## I chose the cloud

Finally I ventured into cloud computing and successfully passed the Azure Fundamentals exam. In December of this year I also gained both Microsoft DevOps and Security Engineer credentials along the fundamentals exams across ai, data and powerplatform.

2020

## Got Into Computers

I was admitted to ISTIC, where I pursued computer engineering degree I am currently guiding you through I hope you find my journey and what I built helpful.

2020

## Bac is the time

This critical year marked my advancement to college, I've had mechanical and electrical engineering. I love the latter a lot which got me to pursue computers later. Also this is literally where I started taking my life seriously.

2022

## Secured internship

I embarked on AWS migration internship, culminating in a successful defense by year's end, while simultaneously navigating the pursuit of my next career opportunity. Balancing these commitments was challenging, yet it underscored the resilience and dedication within me.

2022

## Joined Consultancy

Here is that, I took on a full-time role as an Azure DevOps consultant, directly applying my technical expertise and cloud computing knowledge to support innovation in Canadian startups.

2023

## End Of college

By another December of this, I had successfully defended my second project, a year-and-a-half endeavor igniting my determination to seek greater challenges and growth opportunities.

2024 & more

## Out to the world and scale

Beginning in January, I graduated and embarked on a brief yet impactful journey with Google Premier Partner iSolution, another exciting new chapter begins.
